

GRADUATE PROGRAM ANDREW & PEGGY CHERNG DEPARTMENT OF MEDICAL ENGINEERING

The Andrew and Peggy Cherng Department of Medical Engineering at Caltech applies engineering principles in the health sphere. Our goal is to design and fabricate devices and systems for translational medicine—including imaging, diagnostics, therapeutics, and implants—that will lead to cheaper, more effective, and more accessible health care.

In light of the increasing complexity and prevalence of engineering in medicine, the department brings together experts in the fields of aerospace engineering, applied physics, biological engineering, chemical engineering, computer science, electrical engineering, materials science, and mechanical engineering.

GRADUATE DEGREE PROGRAM

Medical Engineering

Ph.D. Degree (M.S. included)

ADMISSIONS INFORMATION

www.gradoffice.caltech.edu

All applications must be submitted online through the Graduate Admissions website. The Cherng Department of Medical Engineering focuses on PhD-level research and does not accept students for a Master's-only program. All qualified applicants will be considered. Women and members of minority groups are especially encouraged to apply. Financial assistance for application fees is available for those who qualify.
